Tool & Die Repair

A fundamental component of the precision welding service offered at SJTI is tool and die weld repair. We draw on the expertise of the areas most experienced staff to provide sound weld repair of stamping and forming tools, plastic injection molds, and die cast molds.

Adhering to strict preheat and post-heat guidelines, we successfully perform weld repairs that can be finish machined and returned to service in a matter of hours with very little or no evidence of weld what-so-ever. Our repairs have won the confidence of over 150 steady customers who continually depend on SJTI to keep failure rates low and downtime to an absolute minimum.
